Reporting period		Reporting period runs from and including the eleventh day of a calendar month to, and including, the tenth day of the following calendar month. True Balance means, for any Mortgage on any relevant date of determination, the aggregate (but avoiding double counting) of the following: (a) the aggregate of all principal amounts advanced to the relevant Borrower; and (b) Capitalised Expenses; and (c) Capitalised Interest; and (d) (to the extent not covered by paragraphs (b) and (c) above) Capitalised Arrears; and (e) any other amount (including, for the avoidance of doubt, Accrued Interest and Arrears of Interest) which is due or accrued (whether or not due) and which has not been paid by the relevant Borrower and has not been capitalised in accordance with the relevant Mortgage Conditions or with the relevant Borrower's consent but which is secured or intended to be secured by that Mortgage, less any repayment or payment of any of the foregoing made on or before the end of the Business Day immediately preceding the date of determination and excluding any retentions made but not released and any Additional Borrowings committed to be made but not made by the end of the Business Day immediately preceding the date of determination.
True Balance		Current non-indexed LTV is the aggregate true balance of all loans within a mortgage account, divided by the value of the property securing the loans in that mortgage account at the date of the latest lending. Current non-indexed LTV is reported as zero where a customer borrower paid more than the outstanding balance of a mortgage. Current indexed LTV is the aggregate true balance of all loans within a mortgage account, divided by the indexed value of the property securing the loans in that mortgage account at the reporting date. Indexation is applied on a regional basis to property valuations on a quarterly basis in January, April, July and October of each year using the Halifax House Price Index published by Marks Group Limited. Indexed LTV is reported as zero where a customer borrower paid more than the outstanding balance of a mortgage.
Current non-indexed LTV		Monthly Constant Pre-Payment Rate (CPR) is calculated as the total unscheduled principal receipts received over the last Calculation Period, divided by the total principal amount outstanding of the loans comprised in the portfolio at the beginning of the last Calculation Period. Unscheduled principal receipts does not comprise payments from HSBC UK Bank plc for the repurchase of loans from the portfolio. These are annualised using the formula: $1 / (1 - M^M)^{12}$ where M is the monthly CPR expressed as a percentage.
Current indexed LTV		Monthly Principal Payment Rate (PPR) is defined as the total scheduled and unscheduled principal receipts received over the last Calculation Period, divided by the total principal amount outstanding of the loans comprised in the portfolio at the beginning of the last Calculation Period. These are annualised using the formula: $1 / (1 - M^M)^{12}$ where M is the monthly PPR expressed as a percentage.
Monthly Constant Pre-Payment Rate (CPR)		Quarterly Average CPR/PPR is the average of the three most recent monthly CPR / PPR expressed as a percentage. These are annualised using the formula: $1 / (1 - M^M)^{12}$ where M is the Quarterly Average CPR/PPR expressed as a percentage.
Monthly Principal Payment Rate (PPR)		Number of Months in Arrears means, as at the date of determination in respect of a Mortgage, the result of the calculation (A-B) / C, where: (a) 'A' equals the sum of all Monthly Payments in respect of advances under that Mortgage that were due and payable by the relevant Borrower on any due date up to that date of determination; (b) 'B' equals the sum of all payments actually made by that Borrower in respect of that Mortgage up to that date of determination (the difference between 'A' and 'B' being the "arrears balance"); and (c) 'C' equals the then Monthly Payment in respect of all advances under that Mortgage.
Quarterly Average CPR/PPR		Mortgage Collections include all cash receipts on a mortgage within the portfolio excluding monies paid by HSBC UK Bank plc in respect of mortgages repurchased from the portfolio.
Arrears		Seasoning refers to the number of months since the date of origination of the loan.
Mortgage collections		Remaining Term refers to the number of remaining months to maturity of each loan.
Seasoning		Weighted Average (WA) All Weighted Average (WA) calculations are weighted by True Balance.

Counterparties, Ratings table		The swap provider(s) rating trigger disclosed is the next trigger point. There may be subsequent triggers, as detailed in the relevant swap agreement. There are no minimum ratings for the issuer, although its ratings are linked to certain programme triggers - see the Programme Triggers section. Swap details relate to interest rate swaps and exclude covered bond swaps. HSBC UK Bank plc entered into a fixed interest rate swap to hedge against some or all possible variances between interest payable on cover pool and compounded daily SONIA rate. The waterfall reported (including intercompany Loan Settlement) is that which will be made in the next reporting period.
Accounts, Ledgers table		Members' profit is paid once a year, on the LLP payment date, which the anniversary of the programme establishment falls into. Ledgers and Accounts balances are reported as at the reporting period end, before the distribution of revenue and principal receipts. For full description of the ACT requirements, please refer to the Prospectus.
Asset Coverage Test ("ACT") table		Method A(i) is calculated as the lower of (i) the actual True Balance of the Mortgage and (ii) the Partially Indexed Valuation relating to that Mortgage multiplied by M (where for all Mortgages that are less than three months in arrears or not in arrears, M = 0.75, for all Mortgages that are three months or more in arrears and have a True Balance to Partially Indexed Valuation ratio of less than or equal to 75 per cent, M = 0.40; and for all Mortgages that are three months or more in arrears and have a True Balance to Partially Indexed Valuation ratio of more than 75 per cent, M = 0.25). Method A(ii) is calculated as the Asset Percentage multiplied by the lower of (i) the True Balance of the Mortgage and (ii) the Partially Indexed Valuation relating to that Mortgage multiplied by N (where for all Mortgages that are less than three months in arrears or not in arrears, N = 1, for all Mortgages that are three months or more in arrears and have a True Balance to Partially Indexed Valuation ratio of less than or equal to 75 per cent, N = 0.40 and for all Mortgages that are three months or more in arrears and have a True Balance to Partially Indexed Valuation ratio of more than 75 per cent, N = 0.25).
Programme-Level Characteristics table		Item 8 of the Asset Coverage Test includes principal balances distributed back to the seller in the next reporting period. Balance disclosed as GIC account is made up of the following LLP bank accounts at the reporting period end: Covered Bond Account (includes cash collected from mortgages on the last day of the reporting period, passed to the LLP on the first day of the following reporting period), Interest Accumulation Account, Reserve Account and Pre-Maturity Liquidity Account. Balance disclosed as Aggregate deposits attaching to the cover pool (GBP) is the amount required under item 8 (last-off risk) of the ACT. The nominal level of over-collateralisation includes cash held on the principal ledger, excluding any waterfall distributions back to the seller in the next calendar month. The Constant Default Rate is not applicable to revolving programmes. Moody's Timely Payment Indicator and Moody's Collateral Score (N) are sourced from "Moody's Investor Service". Fitch Payment Continuity LipR (FCU) is reported as Fitch Discontinuity Cap. Mortgage collections (unscheduled - interest) is not reported as all unscheduled collections are treated as principal.
Mortgage collections table		Mortgage collections (unscheduled - principal) does not comprise payments from HSBC UK Bank plc for the repurchase of loans from the portfolio, and comprise capital repayments and redemptions other than those received at the expected term end date of the loan.
Loan Redemptions & Replenishments Since Previous Reporting Date table		Loan redemptions and loans bought back by seller are reported as of the immediately preceding reporting period end. Loans sold into the cover pool are reported as of the reporting period end.
Product Rate Type and Reversionary Profiles table		Standard Variable Rate (SVR) refers to HSBC Standard Variable rate applicable to residential mortgages. Arrears are based on the index rate, therefore fixed loans are reported at the fixed rate, tracker are reported over BBR (4.00%) and variable over SVR (6.79%). The initial rate is considered to be the same as the current rate.
Regional distribution table		Regions are defined in line with Level 1 of the Nomenclature of Territorial Units for Statistics (NUTS) codes of the United Kingdom.
Respayment type table		The analysis is performed at loan level and therefore there are no balances shown as part and part.
Employment status table		Employment status reported is the latest information held on borrower's record. First borrower's employment status is reported. Where the first borrower is unemployed, then second borrower's employment status is reported.
